

Electrical pump for ventilation of fuel systems of HDEP/MDEG diesel motors in utility vehicles

DEG 01_24VDC (060504_2)

Electrical pump for ventilation of fuel systems of HDEP/MDEG diesel motors in utility vehicles. 24 V/DC power supply via battery terminals. Suction hose with integral fuel filter. Ventilation process can be precisely observed via an integrated pressure gauge with a measurement range of 0...10 bar, glycerine-filled. Automatic device switch-off at maximum pressure of 6.9 bar.

- 24 V/DC power supply
- Light metal housing with carrying handle

shipment

- 1 electr. pum
- 1 suction hose, length 3.00 m, with fuel filter
- 2 spare filters including clamps
- 1 pressure hose, length 2.50 m (8.2 ft), with quick-connect coupling
- 1 electr. connection cable with battery terminals
- 1 lead for power supply from battery
